

VIRTUAL VIDEO MUSIC BINGO

It's BINGO but...with a TWIST! Instead of numbers, we will play music clips. This fun and interactive virtual activity is sure to keep your guests fully engaged!

TeamUnity has taken bingo to the extreme with our fast paced, exciting challenges. We start off by playing a few seconds of a song that participants must identify (song titles do appear on the screen). If a participant's bingo card lists the song played, it is then marked off. Each round has a list of songs that play until a winner is declared. Each bingo card consists of 25 song titles so there is a good chance each participant will not have every song on his/her card. Similar to traditional Bingo, the first player with 5 in a row wins.
